

TRANSPORT PACKAGING

The THIMM Flexible Tray is a transport packaging with a flexible compartment that securely fixes and protects products during transport. The special feature of the compartment is its flexible adaptation to any product size and shape. The compartment is easy to assemble and offers different variations in the arrangement of the products.

THIMM Flexible Tray

Flexible tray for different product sizes

CUSTOMER BENEFITS

One Tray - Many Possibilities

- » A range of packaging options for different product shapes and sizes
- » The frames have been designed to be flexible so they can be tilted or divided as required
- » The cross-frames are single pre-cut pieces without slits. They provide the support and can be moved if required
- » Environmentally friendly product fixation made of corrugated board offers a high product protection

Less handling required

- » Simple and fast packaging assembly
- » The folded die-cut piece also acts as a full-surface base for additional product protection
- » The base enables the trays to be stacked on top of each other
- » Fewer work steps as no pre-assembly of the trays required

ENVIRONMENTAL ASPECTS / SUSTAINABILITY

- » Easy recycling thanks to single-material solution made of 100% corrugated board
- » Avoidance of environmentally unfriendly packaging materials
- » packaging concept as a more sustainable alternative to solutions ut of styrofoam or plastic

» Design number: D000106251

APPLICATION AREAS

- » Transport of bottles, blister & bagged goods
- » Can be realised for any product shape and size
